## about us

# A privately held company built on stability, strength and integrity

Maela Distributors and Projects is a fully female owned and 100% B-BBEE company established in 2007.

Maela Distributors owns and operates an ever-growing fleet of vetted and approved trucks, shuttle and coach services throughout South Africa.

Our company has a national foot print in South Africa with a depot in the following areas:

- » Limpopo
- » Gauteng
- » KwaZulu-Natal
- » Eastern Cape

## our vision

Enable the Movement of People, Goods and Services Freely & Responsibly

## our mission

Providing the Most Comprehensive, Flexible, and Innovative Fleet Experience on the Planet

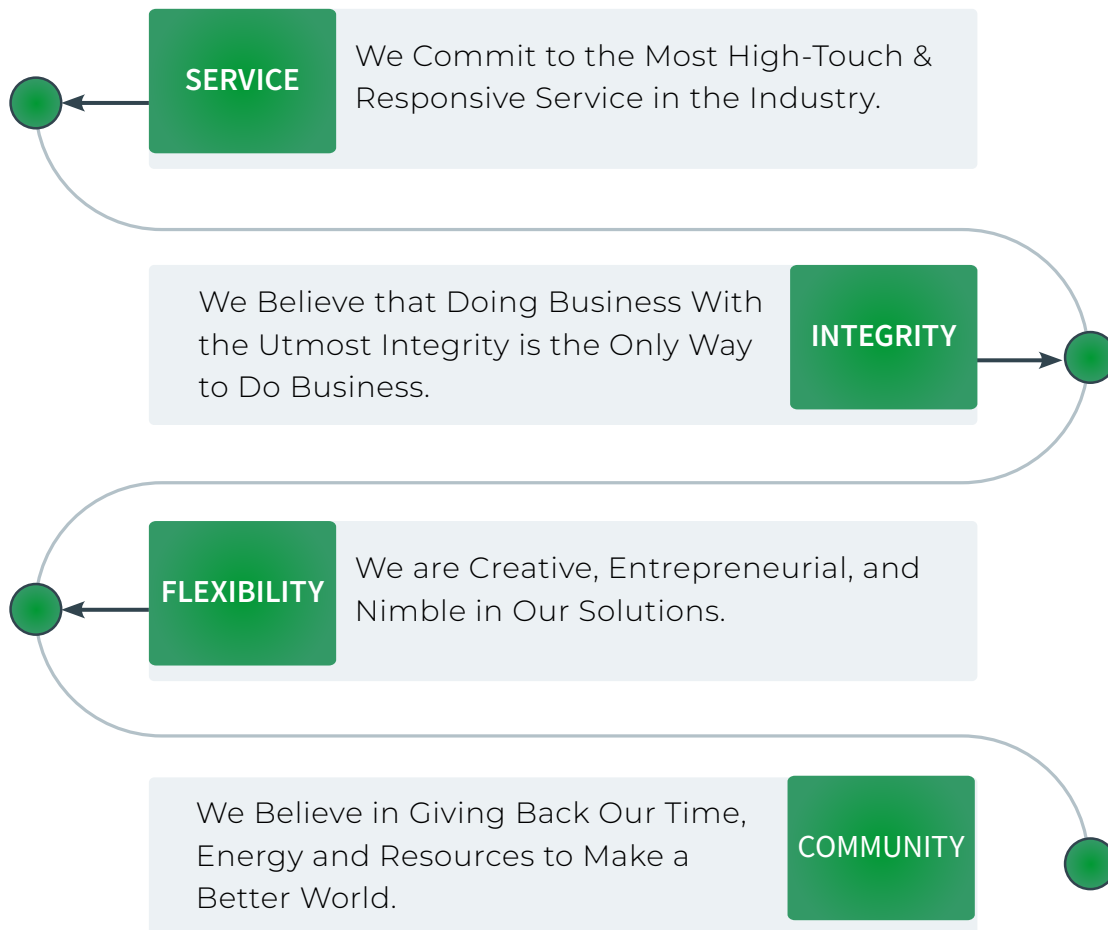

## our values

See who we are as people, and you'll see what we can do for you as a company.

You'll feel the culture difference the first time you walk in our doors, a positive atmosphere of caring and mutual respect. It's Maela Distributors Way – where people come first and feel valued.

## Innovation

We Cultivate Out-of-the-Box Thinking, Continuous Improvement, and Technology

why choose us

# Quality transport services for more than 10 years.

Choose Maela Distributors and Projects as your partner, and you will benefit from:

- » Drivers are regularly assessed and we are committed to regular staff training.
- » All staff are trained in CPR, First Aid and Internal Standard Operating Procedures.
- » All busses are equipped with dedicated cell phones to ensure they remain contactable at all times.
- » The scholar service currently operates within NKR suburbs.
- » The scholar shuttle service operates within a 0-10KM radius from the point of pick-up offering the flexibility of one-way or return shuttles.
- » We text parents as soon as we deliver children safely to their destination.
- » We can accommodate schedule changes or additional requests.
- » Every vehicle in our fleet is equipped with satellite tracking and management systems to monitor, amongst other things, speeds, routes and location.
- » We have childminders on most busses, however, there are selected routes that may operate without one.
- » Vehicles are comprehensively checked daily.

## our services

# We have the answer to your business transport needs.

No matter your industry or business size, we can take care of every aspect of your transportation and fleet needs

### **Scholar Transport**

Adherence to Time Schedule

Drivers are provided with a timetable with pick up points and times along the bus route. This timetable is stuck in the bus where it is visible to the driver and the learners. To ensure punctuality of learners to and from school, drivers are required to be present by 5:30 am at their buses which allows them an early start and also accommodating for any unforeseen challenges in the morning.

### **Coach Hire**

Safe & Comfortable Transport Solutions.

Maela Distributors offer a wide variety of semi-luxury and luxury coach hire transport solutions for any medium to large scale transport needs co-ordinating all your transport requirements and ensuring safety and comfort. We offer a wide range of 16 to 60 seater semi luxury and luxury coaches for any social or corporate event. Send us your request and we will offer advice on the best option for the service you require and will quote you accordingly.

## our services

### Special Hire Service

We cater for weddings, corporate events and other special occasions.

We offer specialised private hire services to organised groups such as churches, schools, clubs and societies as well as hires for funerals. Our private hire service has risen in popularity amongst communities where we operate. Whether its funerals, weddings and any other travel for leisure.

### Specialized Transport

We plan, manage, and transport specialty cargo.

We have earned a reputation for reliable and safe transport of special cargo that requires special handling or white glove service. From fine art, concert equipment and trade show booths, to oversize and over-dimension processing equipment. Our experienced specialized transport shipping services team coordinates with your team, and our network of specialty carriers, to deliver your cargo, on time and on budget.

Maela Distributors has decades of experience transporting specialized freight. Our logisticians will plan the most efficient and cost-effective route for your shipment, using the equipment best suited to transport your cargo. We understand the vital nature of your cargo and will plan all aspects of the move to ensure safe, timely transport. Maela Distributors will survey the delivery site, taking into account your delivery window and the care required by your specialty shipment. We'll arrange for any necessary equipment needed at pick-up and delivery, such as forklifts and cranes.

### Truck & Plant Hire

We offer a large selection of trucks in our fleet.

Maela Distributors are contractors that specialize in trucks and plant hire, plot clearing, levelling, rubble removal and more.

We pride ourselves on timely and professional service delivery. Be it for the hiring out of our various machines, or be it when we are contracted to assist with earthworks for a new project.

Our truck hire service is geared to various different sectors including private individuals, SME's and corporate companies. We offer short to medium term rentals to private individuals and SME's and cater for short to medium-term rentals

# our services

## Fleet management

Your Fleet Managed By The Experts

Maela Distributors is an experienced fleet management provider, helping organisations across South Africa with a bespoke approach to fleet management solutions. A bespoke service means that we will factor in each aspect of your current fleet operations – whether you need more support with administration, or you're struggling with vehicle acquisition, our unique approach means that you will have a solution that adapts to your needs.

Our comprehensive range of services includes:

- » Vehicle acquisition & disposal
- » Contract hire cars for your fleet
- » Business vehicle rental
- » Maintenance management
- » Accident management
- » Corporate risk management
- » Fuel cards
- » Fleet driver services
- » Grey fleet support
- » Fleet strategy & consultancy
- » Fleet administrative services
- » Logistics services
- » Mini-lease

As an experienced fleet management provider, the team at CLM knows that one size certainly does not fit all. That's why we ensure your fleet solution fits your requirements from the very start of our relationship.

Maela Distributors has been providing bespoke fleet management services for almost 15 years, and continues to support corporate customers with tailored solutions. Contact us to find out more about Maela Distributors and how we could help your processes become more efficient.

All the services provided by Maela Distributors can be tailored to the needs of our clients, ensuring we pinpoint the areas where you require the most support and the key areas for growth. Our intention is to provide you with a fully outsourced fleet management solution that factors in your needs and business objectives.

## our services

# Solar Energy

### HYBRID SYSTEMS

- ✔ These are most popular systems. They are cost effective and provide energy through a combination of solar, battery and the grid.
- ✔ Hybrid systems can be implemented in either single or 3 phase configurations.
- ✔ Over time, we have learned that a typical household users consume approx. 40% of daily energy needs while the sun is shining and the balance when the sun is not shining. Below is a typical household user with a hypothetical solar curve superimposed onto the consumption curve.
- ✔ Typical users are households, smaller offices, that also require battery backup for load shedding purposes. The 2 scenarios require different design criteria.
- ✔ We pre-build all our Hybrid solutions onto a backboard and pretest all the hardware before commencing the on site installation.

### BACKUP AND ENERGY DOCK

- ✔ For clients requiring back up for load shedding or any other reason, we offer a range of products in varying sizes, designed around your consumption and the amount of back up hours needed.
- ✔ Our Energy Dock range is designed with the user in mind. We offer solutions from 500VA invertors all the way up to 5kVA invertors with batteries ranging from 1,28kWhr all the way up to 10kWhr. Our batteries are proudly locally manufactured and use the latest LifePO4 (LithiumIon) technology. All systems carry a 5 year no nonsense guarantee.
- ✔ All back up and Energy Dock systems are easily upgraded to full Solar Solutions.

## GRID TIED SOLUTIONS

- ✔ Mostly used in environments where most consumption is used during daytime, for example, offices, factories etc. Generally these system are integrated with a generator as another buffer against load shedding. It is important to know that grid tie inverters fail when the grid fails. It is a regulatory requirement to prevent feedback while grid is down.
- ✔ For environments that cant afford to go down for a spilt second when the grid fails batteries can be integrated as well.

## OFF GRID SYSTEMS

- ✔ No other means of electricity supply. This system is completely autonomous from the grid. It generally requires large batteries for energy storage.
- ✔ Typical users of off grid systems are, farmers, rural dwellings and game lodges, where a Grid connection is not possible, or to acquire an electrical connection costs more than a solar system.

## DC STAND ALONE SYSTEMS

- ✔ Designed for users without any electricity connection, who require some lights, Cell phone charging, TV, radio, a notebooks. Some of these systems have the capacity to add a 12V fridges/ Freezer to the mix. Typical users are the informal settlements as well as farm steads.
- ✔ Our associate company Dignity Power has been set up to provide businesses with BEE solutions, utilizing these products, while providing informal settlements and under privileged families solar power. Please contact us for more information in this regard

## START SAVING BY GOING SOLAR

Approved Solar is your one stop provider for solar power solutions. Solar batteries, inverters and panels. Save on electricity costs and avoid load shedding.
